

# Seed Spreaders of Zoo Atlanta

**Across**

- 6. Pancake tortoises wedge between rocks to \_\_\_\_\_ predators.
- 7. The white stork uses its long, sharp \_\_\_\_\_ to forage for fish and insects.
- 9. Rhinos are essential to the health of their \_\_\_\_\_ ecosystems.
- 10. The red-eyed treefrog only eats insects. We call this an \_\_\_\_\_.

**Down**

- 1. Gorillas give back to the forest by providing fertilized seed \_\_\_\_\_ to the forest floor.
- 2. A special name for animals like lemurs that only eat fruit.
- 3. Find Exhibit 35, and the name of the iguana will get you closer to solving this mystery.
- 4. Zebras are \_\_\_\_\_ grazers, cutting through old plant growth with sharp teeth.
- 5. Elephants eat several hundred pounds of food a day, and poop several \_\_\_\_\_ pounds.
- 8. The blue-throated macaw, once thought to be \_\_\_\_\_ was rediscovered in 1992.
